

Bike to School ≡ Week 2019

23 to 27 September

in association with  **Sustrans**

We took part in bike to school week from 23rd-27th September. We tried to encourage as many children as possible to travel to school in a sustainable way but walking, scooting or cycling. We understand the importance of this for our environment and the wider world. Also, the importance this has for our own health benefits.

For those families who are unable to travel to school in this way and have to use a car we suggested that they parked further away from the school and walked as much as they could when possible.

Each class had a bike to school survey that they had to complete each day, then the eco reps analysed the results to see what patterns or trends they noticed.

The majority of children do walk, cycle or scoot to school but we still do have a number of car journeys. The weather wasn't great that week which can also make a difference but we will continue to work on this important area and encourage more children to walk, cycle or scoot to school when possible.
