

We recognise the importance of saving energy and the impact that this can have on our environment and the wider world so we took part in switch off fortnight to raise everyone's awareness of this important issue.

Our eco reps completed energy audits prior to switch off fortnight and once we had completed the campaign they completed the audits again to see if we had made an impact. We are pleased to say that the eco reps found more lights and computers switched off when not in use when the campaign had finished which is great news.

The eco reps also presented information to their classes about this important issue and pledges were made to say what each class would do to reduce wasting energy.

These pledges included:

"Turning off computer screens when they are not being used rather than leaving them on standby"

"Turning all the lights off when leaving a room"

"Closing doors and windows when heating is on"

We also spoke about the importance of doing these things at home and other places so that together we can make a real difference.

What pledge could you make to save energy?
