

We took part in switch off fortnight highlighting to our school community the importance of saving energy where possible to help save the environment.

We recognise how important this is and although we raised awareness of it during the designated fortnight we are continuing to reinforce the message and have made posters that are displayed around the school to remind everybody to turn off computers, lights etc. when they are not using them.

Help us to save the environment by switching off things at home as well when you are not using them and by spreading the word to everyone!
