From 20th to 24th May our school took part in 'Walk to school week'.

We focused on the positive impact that walking, scooting and cycling to school can have not only on our own personal health but the positive impact it can have on our local environment and wider world.

We recognise that walking, scooting or cycling to school is not possible for everybody so we also encouraged people to consider car sharing where possible or parking a reasonable distance from the school and walking the rest of the way so 'park and stride'.

Each class in school had a walk to school survey that they completed each day and tried to improve the number of children who travelled to school in a sustainable way each day.

We hope this important message will not just last for our dedicated week but for the future as well.

Together we can make a difference!

Walk to school week survey
20th-24th May 2019

How did you travel to school today?
