

In October we took part in 'Be bright, be seen'. All the children learnt about the importance of being bright when walking on the pavement or cycling their bikes where the evenings start to get darker sooner and the mornings stay darker for longer.

Each class researched the best reflective clothes to wear and accessories to put on their bags, bikes, scooters etc. Classes watched videos and designed posters to inform others about this important message to keep everyone as safe as possible.

What could you do to be bright and be seen? Could you brighten your bag? Could you make your own high vis tag? Could you create a twilight trail?
